YOUR NEXT SKILL

Choose your starting point.

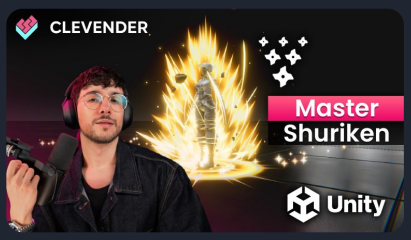

A suggested route through individual courses. Start at your level; enroll in each course separately.

01 / Get comfortable in Unity

Free foundation for navigating the editor and setting up your workspace.

Start free >

02 / Build and control particles

Explore the Shuriken modules, create effects and learn to optimize them for games.

Explore course >

03 / Create your VFX textures

Build procedural masks, noise, splashes and distortion textures for Unity or Unreal.

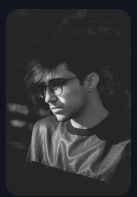

Explore course >

+ / Present the work you create

Record, edit and present your effects. An optional step once you have work to show.

Learn with Ge Lush

Real-time VFX artist, founder of Vefects and Unreal Authorized Instructor.

Meet your instructor & see the work >

TURN CURIOSITY INTO PRACTICE

Make one intentional change.

Use the free asset as a starting point for observation. Try this short exercise in a copy of the demo, with the controls the asset provides.

YOUR PRACTICE CHECKLIST

- [ ] Watch the demo: what catches your eye first?
- [ ] Choose one exposed setting to investigate.
- [ ] Change it, then compare with the original.
- [ ] Capture a short before-and-after clip.
- [ ] Write down what changed and what to learn next.

What did you discover?

Note the setting, the result and your next question.
